ABOUT MY WORK

Everything started with a shock of cultures, idioms and colors. As a Colombian American, there are a lot of things one can explore when it comes to design. Most of the very bright and colorful area of my work mainly reflects where I grew up. Along with that entire fiesta experience there is also there is my American side as an environmentalist ready to make you laugh about political and social issues. Mix those two cultures and ideologies together and you get an explosion of creativity and energy.
